Projects

- **REST Countries App-** A react app I made using the Rest Countries API. It has a filter bar and a dropdown menu to filter countries by region. Technologies used include React React-Router-Dom and React Bootstrap,
  - Github: https://github.com/Mattvp21/countries.git
  - Live Site: https://benevolent-platypus-1506aa.netlify.app/

- **SmartBrain App -** A face-detect application made with the Clarifai App. This is a Full Stack React Application utilizing node.js on the backend and a SQL database using Postgres.
  - Github: https://github.com/Mattvp21/smartbrain-app.git
  - Server: https://github.com/Mattvp21/smartbrain-api.git

- **So you want to travel to Space-** This is a different take on the traditional To-do app. It has filter tabs for the All, Active, and Completed tasks. Built using React with hooks and Sass preprocessor for the styles.
  - Live site: https://euphonious-biscochitos-359ecc.netlify.app/

Education

2009-2011
BA in Liberal Studies
SUNY Purchase College
Clubs: WPSR: Radio DJ & show organizer
Flag Football

Certifications

Zero to Mastery - Complete Web Developer in 2022: Zero to Mastery. Completed *February 2022*
Master the Coding Interview: Data Structures and Algorithms:: Completed *June 2022*

Other Experience

Frontend Mentor *https://www.frontendmentor.io/profile/Mattvp21*

‣ *Completed 20 frontend challenges that range in difficulty from Easy to Intermediate*

‣ *Commented on other developers solutions offering advice*
